

# COURSE FOR QUALIFIED INSTALLERS OF FALL PROTECTION SYSTEMS

12-13 SEPTEMBER

11-12 NOVEMBER

The course analyzes the risks related to falls from height and the reference standards, going deeper to investigate the solutions for fixing on the substrate, the assembly specifications and the correct filling of the manuals relative to the installation of safety products.

It will be showed the selection criteria to access to coverage, the type of fall protection system and fixing type in order to optimize the ratio cost / performance. A part of the course is dedicated for learning and the practice of installation of the safety life lines and how to use PPE category 3 to prevent falls from a height.

## SPEAKERS

---

Dominik Paoli

---

## INFORMATION

---

course code: RSCAEN

---

Participants will receive a certificate of participation

---

## PRICE PER PERSON

---

Course & 2 days accommodations, lunch and 1 dinner:  
350 € + VAT

---

Only course & lunch:  
250 € + IVA

---

*\*course & 3 days accommodations, 2 lunches and 3 dinners, transfer to and from the hotel and company (transfer to and from the airport/railway station is not included)*

## DAY 01

08.30 | 09.00 *presentation of the course*

09.00  
10.30

### GENERAL INTRODUCTION TO THE TOPIC OF FALL PROTECTION SYSTEMS

Statistics and sectors involved

### TECHNICAL NORM EN 795:2012

Explication of the norm and differences to EN795:1996

### TECHNICAL NORM CEN TS 16415:2013

Explication of the norm for multiuser devices

10.30 | 10.45 *coffe break*

10.45  
12.30

### EXAMPLES OF THE VARIOUS TYPES OF PRODUCTS

Examination of types of devices and possible applications

### EXAMPLES OF WORK AT HEIGHT

Examination of types of works in height and possible solutions

### MANUALS OF THE PRODUCTS

Analysis of the product manual and sensibilisation of its importance

12.30 | 13.30 *Lunch*

13.30  
16.30

### PRACTICE OF INSTALLATION OF FALL PROTECTION SYSTEMS

Installation and tips for the correct installation of different products

16.30  
17.00

### CORRECT INSTALLATION FORM

How to complete correctly the correct installation form

## DAY 02

08.30  
09.00

### BASIC CONCEPTS OF FASTENING CALCULATION FOR FALL PROTECTION SYSTEMS

Introduction on fastening calculation concepts

09.00  
10.00

### BASIC CONCEPTS OF PLANNING

Explanation of the informations needed for a correct planning

10.00 | 10.15 *coffe break*

10.15  
10.45

### EXAMPLES OF PLANNING OF A FALL PROTECTION SYSTEM

Analysis of possible solutions for different types of roofs

10.45  
11.15

### PRACTICE OF PLANIFICATION

Practical workshop for application of the planning concepts aquired

11.15  
11.45

### INTRODUCTION TO 3RD CATEGORY PPE AGAINST FALLS FROM HEIGHTS

General introduction to the PPE technical norms

11.45  
12.45

### 3RD CATEGORY PPE PRACTICE

Practice with PPE against fall from height for different types of work

13.00 *presentation of the certificates / end of the course*
